PRECIOUSTONE COLLECTION, STONE JEWELS

*The precious stone as an expression of splendour, wealth and magnificence.
Its ancestral and contemporary beauty interpreted through limitless creativity.*

The Antolini collection is formed of over **120 carefully selected precious stones**, which are highly sought-after for jewellery and ornamental items.

It is the top of the range in stone coverings and plays the starring role in **unique and one-of-a-kind decorative surfaces**: for tables and walls; for sophisticated and exclusive settings; for furnishing solutions of absolute class.

In the Antolini Precioustone Collection, the translucent, iridescent magic of natural stone reaches unprecedented heights of **elegance and brightness** as a result of workmanship techniques developed through years of research and experimentation.

*To extract the very best colour schemes and patterns from stones
and create striking effects.*

The many varieties and veins, the incredible colours of ancient stones and crystals from all over the world are the result of continuous research that knows no borders and is never interrupted by wild terrain or adverse weather conditions.

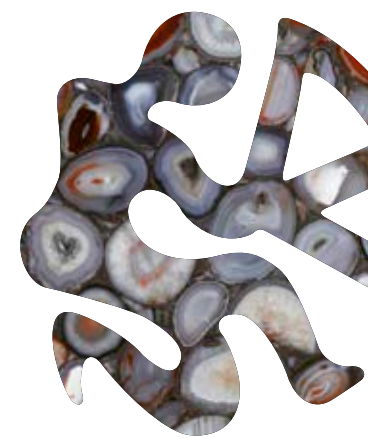

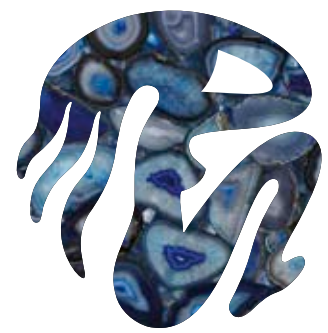

A voyage of discovery and conquest, to create a series of incomparable, exciting achievements that trigger the imagination of architects and designers, as well as their endless ability to combine and rearrange matter.

STONES OF HEALTH AND OF DESTINY.

*Each story is an intriguing blend of history, culture and tradition.
Of real knowledge and superstitious beliefs.
Each stone is a witness to time and times.*

Belief in the healing and propitiatory power of crystals and minerals and the links between stone, health and destiny date back thousands of years and have reached us “regardless of all reasonable doubt”. There are stones that counteract almost every physical or psychological symptom - from interior discomfort to back pain, from stress to headaches - while others attract love and good fortune, friendship and wealth. Earthly objects by definition, stones are able to project into the sky and reflect constellations and zodiac signs, in an **ancestral mix of science and magic**. These are poetic influences that all stem from the fact that for some unfathomable reason a beautiful, perhaps precious, stone helps us live better. It is as simple as that.

STYLE, CULTURE AND COLOUR OF NATURAL STONE

*Antolini excellence thrives on deep-rooted values as the business has evolved
and gradually launched itself onto the international market.
Without ever forgetting its roots and identity.*

Experience, which comes from a long artisan tradition. **Passion**, which is passed down from generation to generation. **Knowledge**, which is literally soaked up by a region with a high marble vocation. **Quality**, pursued with determination and achieved through strict controls of every stage of the production cycle - from direct management of quarries and raw materials through to cutting, shipping and delivery. **Technology**, which is always state of the art and enables us to quickly and accurately produce perfect cut-to-size slabs, flooring, supplies for furnishings, and indoor and outdoor coverings. Tireless global **research** into the very finest stones and the newest, most stunning colours. **A vision** of the future and the artistic and commercial value of every stone. **Insight** into new manufacturing techniques. These are the values that make Antolini an influential source of inspiration for the international market and a focal point for refined clientele and established planners and designers.
