SAPIENSTONE

With over 50 years in the field, SapienStone, creates **highly durable Sintered Stones** that are resistant to chemicals, heat, stains, and scratches. These products are exclusively created from 100% natural materials, making them the **most sustainable** in the market.

SAPIENSTONE

Sintered Stone compared to Quartz

	SapienStone Sintered Stone	Quartz
Durability	<ul style="list-style-type: none"> Pressed and fired at high temperatures, making it durable and long-lasting Extremely resistant - suited to withstand chemicals, heat, UV radiation, wear and tear, and scratches Form and shape are unaffected by sunlight and high temperatures 	<ul style="list-style-type: none"> Resistant to stains and chemicals Due to the resin used for quartz slabs, it is vulnerable to heat Bends and alters form if exposed to high heat and sunlight Not resistant to scratches 
Hygiene / Ease of cleaning	<ul style="list-style-type: none"> The highly durable and dense non-porous structure makes maintenance and cleaning extremely easy Durability ensures that there are no spaces in the surface to house dirt and bacteria 	<ul style="list-style-type: none"> Durable non-porous surface also makes cleaning easy However, due to not being resistant to scratches, it may contain spaces that need to be cleaned 
Environmental Sustainability	<ul style="list-style-type: none"> Exclusively made from natural elements, making it the most sustainable material for tops 	<ul style="list-style-type: none"> Due to the chemical components used for colors and finishes, Quartz is not a sustainable material 
Aesthetic Appeal	<ul style="list-style-type: none"> Easily replicates the look of natural materials Durability of material ensures that appearance and structural integrity are retained 	<ul style="list-style-type: none"> Able to replicate the look of natural materials as well Appearance and structural integrity is subject to change from high temperatures
